THE UNDERFLOW.

An Important And Accidental Discovery in Rawlins County, Kansas.

Possible Solution of the Great Question-Irrigation.

Great excitement now exists in this locality on account of an experiment of several parties who were looking for the underflow. It appears they commenced work near the head of Flanagan's canon near the Indian Sprjngs and ran a tunnel back only about twenty rods when the water broke through the blue clay or shale in such volume as to whisk the workmen and their teams down into the draw and drowned his farm east of town. one mule and two horses, the men barely escaped with their lives. The volume of water now gushing out and running down the draw is about ten feet wide and five feet deep. That it is claimed fully settles the underflow theory. Mr. Flanagan has already been offered \$10,000 for his ranch. It is believed that this volume of water will irrigate 25,000 acres. The city of Atwood is negotiating with Mr. Flanagan to secure the flow of water to irrigate the city and furnish an abundant supply of water for Beaver Lake and Keystone roller mills. This experiment will be fully explained at the meeting to be held at Oberlin. The news has been telegraph to the officials interested in the irrigation scheme and they are expected to come and fully examine the discovery. It seems that was last winter. by the merest accident the whole question of irrigation has been solved and that western Kausas will now have such the Red Willow creek. a boom as never before known in the west. We will give in our next issue the full particulars. We only learned of the wonderful find as we are going to press .- Rawlins County (Kansas) Democrat.

H. M. Potter informs the Republican that about five miles northwest of Hayes Centre, at the Christner farm on the Blackwood, is a well only nine feet deep, at which 500 hundred cattle have been watered without perceptibly lowering the water in the well. Now this well is not many rods from the channel of the Blackwood and there is a gradual slope of the ground from the well down to the creek. It is believed that Burt returned on the Tuesday evening a ditch 500 yards long would run this train. water out into the Blackwood in such a volume that a live stream would be created along its whole length. . If anyone is incredulous we will say that not more than twelve miles west of this well is a natural spring continually flowing a large volume of water, and that the altitude of the spring is greater than the location of the well. We believe it would pay the farmers along down the Blackwood to investigate this matter, and if they can get a continuous flow of water into the Blackwood, of which we have no doubt, by running a ditch to or in the vicinity of the well, it would be greatly to their advantage by the sound of his voice although the to combine together and dig the ditch. Farmers from Hayes Centre all the years. way to Culbertson residing in the vicinity of the Blackwood are interested. Talk it up. The Republican will give \$5 toward the expense of testing the matter.-Hayes County Republican.

Religion and Alliance Politics.

From the New York World.

The great number of the leaders of the Peoples' party movement in Kansas are infidels or free-thinkers. Some few of them are Unitarians, whose belief is much more liberal than that sanctioned by their church. "Sockless" Jerry Simpson is a pronounced unbeliever, and during his campaign for congress in the Seventh district the whole force of the church was arrayed against him. Mrs. Lease is an infidel, and Mrs. Diggs. who, next to Mrs. Lease, was the most powerful campaigner in the Peoples' movement, is a very liberal Unitarian.

Fundamental Doctrines.

From the Richmond Independent.

The people demand and will have what is right. If any party on earth demands more, they are a failure. If they demand less, they ought to die. It may be a question among the contestants as to what is right and what is wrong. The majority rules.

Col. Ingersoll States a Secular Fact.

From an interview in Minneapolis Journal. There are a lot of men in this world who think they are d-d important. But they aren't.

We had been waiting for our old friend, O. S. VanDorn, to give his views on the question of irrigation, but we were not quite prepared for his bold and original plan of taming the hot winds. Original! "Well we should smile." "Dreaming dreams that no mortal ever dared to dream before.' His elevated pipe lines would cost at the very lowest estimate \$2 per foot. The total cost to Red Willow county would be \$7,603,200.00, or \$330 per acre. In justice to Mr. VanDorn, however, we would say that he expects the General Government to loan the people the money at 1 per cent. Besides in the winter time the holes could be plugged and the western end of the pipes be extended into Wyoming and attached to the oil wells and then we could per year. Clubs of 5 or more have coal oil for fuel instead of corn. The railroads would have to reduce the freight rates on coal or go out of

REWARD.

On Wednesday my heavy shaggy long cloak, with no trimming but large buttons, was given by mistake to some drouth-sufferers. A reward will be paid for its prompt return.

CITY LUXURY.

Just as the city looks to the country for most of the luxuries used on its tables, so the country must turn to the city for those conveniences which are justly termed luxuries for the hard-working housewife. City housekeepers have learned to realize that to save time is to lengthen life.

SAPOLIO!

is one of the best known city luxuries and each time a cake is used an hour is saved. On floors, tables and painted work it acts like a charm. For scouring pots, pans and metals it has no equal. IF YOUR STOREKEEPER DOES NOT KEEP IT YOU SHOULD INSIST UPON HIS DOING SO, as it always gives satisfaction and its immense sale all over the United States makes it an almost necessary article to any well-supplied store. Everything shines after its use, and even the children delight in using it in their attempts to help around the house.
